

# MIDDLES *and* PERFECTS

A reinvestigation of the usage and function of the *-t-*infix  
in the Old Babylonian Mari letters

+ a new proposition for the Akkadian T/A/M-*system*

Iris Kamil  
[iris.kamil@ed.ac.uk](mailto:iris.kamil@ed.ac.uk)  
[iriskamil.com](http://iriskamil.com)

# Previously on *The Akkadian T/A/M-system* ...

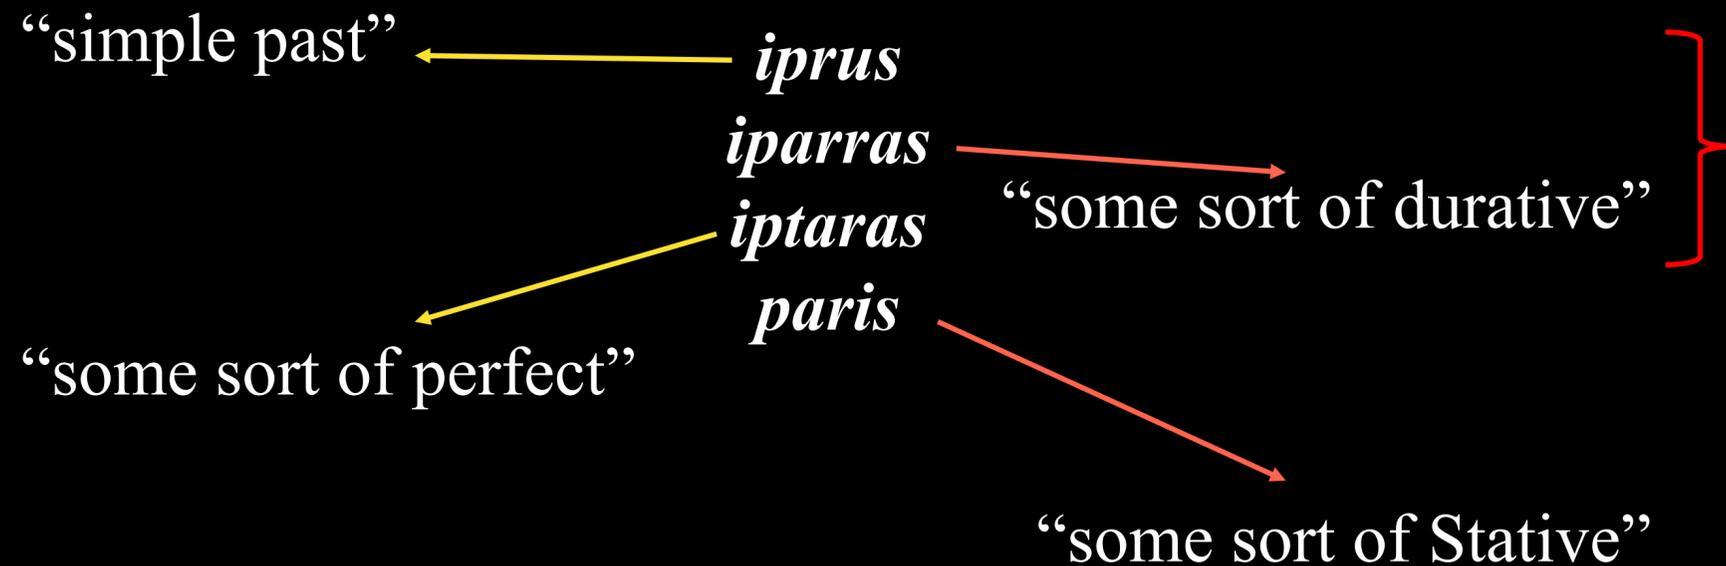

tense

aspect

Problem:  
Either too vague or too detailed,  
but *definitely*: inconsistent.

Disclaimer:  
I am team *aspect*.

Let’s look at how this could work,  
using ARM 1-4!

# *iprus* – punctual-completed

- (1) *tupp-a-ka*                    *ša tu-ša-bil-Ø-am*                    *e-šmê*  
tablet-obl-gen.2.sg.m   rel 2-caus-√wbl.pftv-sg.m-ven 1.sg-√šm'.pftv  
“The tablet, which you have had brought to me, I have heard (read).” (ARM1 20:5)
- (2) *inanna ana nihrār-im a-špur-ma*                    *nihrār-um ana halaš Terqa i-kšud-Ø-am*  
now    dat help-obl 1.sg-√špr.pftv-conj help-nom dat fort.cstr Terqa 3-√kšd.pftv-sg.m-ven  
“Now, I have written to you for help and the help for the fort of Terqa has arrived.” (ARM 3 7:10-13)
- (3) *adi mūl-ê*                    *qaqqad āl-im epir-ū*                    *lā i-kšud-ū*                    *āl-am ūl i-šbat-Ø*  
until height-pl.gen head.cstr city-obl earth-pl.nom neg 3-√kšd.pftv-pl.m city-acc neg 3-√šbt.pftv-sg.m  
“Until the soils have not reached the heights of the head of the city, he will not (be able to) have conquered the city.” (ARM 1 4:9-13)

# *iparras* — continuous-ongoing

(4) *ašrānum-ma ana gamr-im-ma ta-š<ta>kan-Ø-šu u pān-am šanimm-a ta-šakkan-Ø*  
there-conj dat totality-gen-conj 2-√škn<perf>.pftv-sg.m-acc.3.sg.m and face-acc other-acc 2-√škn.impf-sg.m

“You have installed them there definitively and a second one you will be installing.” (ARM 1 18:9-10)

(5) *assurri 10 līm-ī u-ššû-ma 10 līm-ī šāb-am i-ṭarrad-Ø-ma*  
perchance 10 thousand-pl.obl 3-√wš'.impfv.pl.m-conj 10 thousand-pl.obl troops-obl 3-√ṭrd.impfv-sg.m-conj  
*ina Suh-īm sīh-am i-naddi-Ø*  
in Suhaen-pl.gen rebellion-acc 3-√nd'.impfv-sg.m

What if ten thousand men leave and he sends ten thousand men, and a rebellion throws up between the Suhaeans? (ARM 2 30: rev. 4'-5')

(6) *ištu 5 ûm-im ina hadān-im Hanê u-qqâ u šāb-um ūl i-pahhur-Ø-am*  
since 5 day-gen in designated time-gen Hana.gen 1.sg-√q''.D.impfv and troops-nom neg 3-√phr.impfv-sg.m-ven

“For five days, at the designated time, I have been awaiting the Hana, but the troops have not been assembling (yet). (ARM 2 48:5-6)

# *iptaras* – middle and ...?

(7) *šanīt-am*      *tebibt-um*      *i-š-šakkan-Ø*      *šāb-um*      *ū-ta-bbab-Ø*  
second-acc      census-nom      3-pass-√škn.impfv-sg.m      troops-nom      3-mid-√'bb.impfv-sg.m

“Another thing, the census is being put in place, the troops are being counted.” (ARM 1 7:32-33)

(8) *annitam*      *i-qbû-nim-ma*      *abull-āt-im*      *u-š-t-edi-šunūti*  
this matter 3-√qb'.pftv.pl.m-ven-conj      gate-pl.f-gen      3-caus-perf-√yd'.pftv-acc.3.pl.m

„Thus they have told me and I have confined them.” (ARM 3 37:22-23)

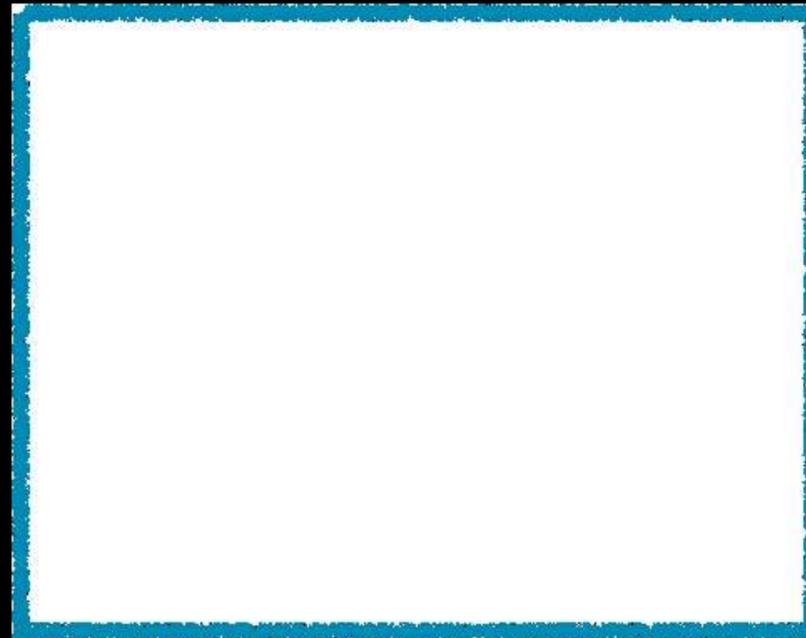

(9) *umman-āt-um*      *šalm-ā*      *umman-āt-um*      *i-p<ta>ṭr-ā-nim*      *ana Hamšâ i-kšud-ā-nim*  
troops-pl.f-nom      √šlm.stat-stat.3.pl.f      troops-pl.f-nom      3-√pṭr.<perf>.pftv-pl.f-ven      dat Hamšâ 3-√kšd.pftv-pl.f-ven

“The troops are well, the troops have been liberated, they have arrived at Hamšâ.” (ARM 1 4:18-21)

# Let's look *at* the forms!

		G	D	Š
Active	iprus	$i-XYV_{RZ}$	$u-XaYYiZ$	$u-ša-XYiZ$
	iptaras	$i-X<ta>YV_{TZ}$	$u-X<ta>YYiZ$	$u-š-ta-XYiZ$
	iparras	$i-XaYYV_{TZ}$	$u-XaYYaZ$	$u-ša-XYaZ$
Middle	iprus	$i-X<ta>YV_{RZ}$	$u-X<ta>YYiZ$	$u-š-ta-XYiZ$
	iptaras	$i-X<ta-(t)>YV_{TZ}$	$u-X<ta-(ta)>YYiZ$	$u-š-ta-(ta-)XYiZ$
	iparras	$i-X<t>aYYV_{TZ}$	$u-X<ta>YYaZ$	$u-š-ta-XYaZ$
Pluractional	iprus	$i-X<ta(Y)>YV_{RZ}$	$u-X<ta>YYiZ$	$u-š-ta-XYiZ$
	iptaras	$i-X<ta-(taY)>YV_{TZ}$	$u-X<ta-(ta)>YYiZ$	$u-š-ta-(ta-)XYiZ$
	iparras	$i-X<tan>aYYV_{TZ}$	$u-X<tan>aYYaZ$	$u-š-tan-XYaZ$

**New approach:  
Morphosyntax &  
Morphosemantics.**

# The *BAE*-Hypothesis

In the D and Š patterns, the only morpheme differentiating between *iprus* and *iparras* is the last templatic vowel.

Crucially, the *iptaras* paradigms are also characterised by a final /i/. It almost seems as though we have the t-morpheme infixed into the *iprus* paradigm...

The Akkadian t/a/m system is founded on and thus encodes the binary differentiation between a perfective (punctual-completed) and imperfective (durative-continuous) ASPECT.

- **Adverbial Modification**  
(temporal, place, manner, degree, etc.)

- **Pragmatics**  
(context, discourse prominence)

- **Syntax**  
(clause type, conjunctions, ordering)

- **Mood**  
(subjunctive, Precative, generally: realis vs. irrealis)

- **Deixis**  
(e.g., venitive)

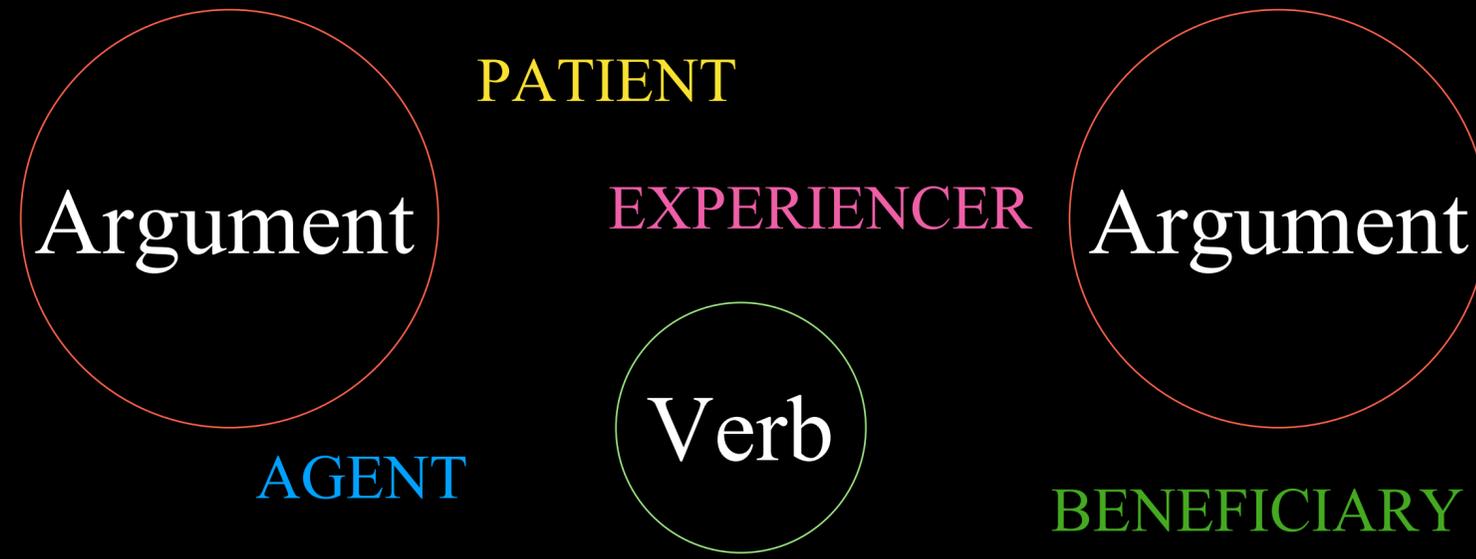

Akkadian *morphologically marks* (viewpoint) aspect but can *make reference* to temporal reference points.

How?

**So what does the *t*-morpheme actually do?**

# Argument Structure

- 1 Argument: intransitive
- 2 Arguments: transitive
- 3 Arguments: ditransitive

John<sub>i</sub> washed his dog<sub>j</sub>.  
AGENT    Verb    PATIENT

John<sub>i</sub> washed himself<sub>i</sub>.  
AGENT    Verb    PATIENT

THEME                      GOAL

Middles temper with Argument Structure and rearrange relationships between arguments.

→ also the  
t - Middle !

**But that was the Middle-*t*.  
What about the Perfect-*t*?**

# Event Structure

The t-morpheme tempers with  
Event Structure and relates  
between events.

**Discourse Configurational  
Languages  
(Kiss 1995)**

# Tying it all together

“But hey! Does this system work with the Stative, too?”

*yes!* → Kamil (2023)

BAE states and implies that Akkadian speakers morphologically marked aspect, making a binary distinction between

*iprus*  
(punctual-completed)      *iparras*  
(durative-continuous)

perfective (punctual-completed)

and imperfective (durative-continuous)

events.

Reichenbach (1947)

*iptaras* does not disturb this symmetry. It merely tempers with the event structure or discourse configuration.

*iptaras*  
(relating events)

## Conclusion

While *iprus* and *iparras* mark the binary difference between punctual-completed vs. durative-ongoing actions, *iptaras* marks a sort of “middle” to *iprus*: it *relates* different events.

# And the best part?

Table 1: Akkadian Template Patterns

	SIMPLE	INTENSIVE	CAUSATIVE
Active	iprus	uparris	ušapris
Middle	iptaras	uptarris	uštapis
Passive	naprus		

The templates are not morpheme units. They are made up of multiple morphemes themselves!

Assigning semantic value to morphemes and seeing how they interact with other morphemes and in different contexts?

+ root  u-šā-bil-ū-nim

**Tense**  
**Person**  
**Voice** **Mood**  
**Number**  
**Gender**  
**Argument structure** **Aspect**  
**Agentivity**

We can do this for every other morpheme, too!
